

The RPC Pipe Systems

Value Advantage

Economies

- Lower cost for medium to larger bore pressured applications
- Lower transport to site costs
- Lower assembly and installation costs
- Lower pump energy and operating costs
- Lower lifelong maintenance and repair costs

Substantial lifelong economies

Performance

- Superior corrosion resistance (immune to galvanic corrosion)
- Superior resilience to dynamic stresses (cyclic loading)
- Superior low water hammer surge celerity
- Superior UV and abrasion resistance
- Superior inert and electrically non-conductive properties

Exceptional lifelong performance

Efficiency

- Best in class hydraulic efficiency (lowest friction coefficient)
- Best in class embodied energy efficiency
- Best in class design flexibility to optimise performance
- Best in class weight to strength
- Best in class effective service life

Superior lifelong efficiency

Reliability

- Engineered precisely for Australian conditions and Standards
- Tailored, tested and quality assured exactly to specification
- Manufactured and technically supported in Australia
- Proven reliability and performance of REKA pipe joint systems
- Backing of world leading Flowtite™ technologies

Outstanding lifelong reliability
